EDUCATION

Master in Economics: Empirical Applications and Policies
UPV/EHU (University of the Basque Country)

Bilbao, Spain
Sep 2025 – Present

International Master in Finance (Financial Times ranking: #20)
EADA Business School Barcelona (Financial Times Europe #19)

Barcelona, Spain
2018

Official Master in Business Management (Double Degree)
University of Vic – University of Central Catalonia

Barcelona, Spain
2018

Bachelor of Economics in Finance
Xi'an International Studies University

Xi'an, China
2017

RESEARCH PROJECTS

Electricity Market Dynamics and Pricing

- Using OMIE intraday market-share data for Spain (2021–2025), measured concentration with $R(1-3)$, HHI, HTI, Entropy, EXP, and CCI, and tracked instability over time.
- Using OMIE day-ahead hourly bid data for Spain (2020), built stepwise supply-demand curves and estimated equilibrium prices; compared linear and polynomial specifications with AIC/BIC/RMSE.
- Using daily electricity prices for Ireland (2015–2025), computed return-based descriptives and estimated ADF/PP and VAR models to assess persistence, seasonality, and volatility dynamics.

Textual Analysis of Academic Titles

- Scraped 69 papers from Google Scholar; built a structured dataset of titles, authors, year, citations, and journals.
- Applied Bing/NRC/AFINN lexicon analysis on the scrapped data, aggregated yearly sentiment series, built an R app using Shiny

Student Achievement Prediction Using Machine Learning Techniques

- Using PISA Hong Kong microdata, built Math_Score from PV1–PV10, removed leakage/ID variables, and engineered 34 predictors.
- Compared OLS, Ridge, LASSO, Elastic Net, Basic tree, bagging, random forest, and boosting; tuned GBM achieved best results.
- Performed PCA and k-means clustering on SES and attitude variables.

High-Speed Rail Expansion and EV Adoption in Spain

(ongoing Master's Thesis; supervised by Prof. Javier Gardeazabal)

- Estimate the causal impact of HSR expansion on EV adoption using DGT and rail-network GIS data.
- Methodology: staggered DiD (Callaway & Sant'Anna) and IV design.

PROFESSIONAL EXPERIENCE

E-House (China) Holdings Limited, CRIC Division

Consultant, Data Service Department

Shenzhen, China
Mar. 2019 – Aug. 2022

- Delivered quantitative market and financial analysis for real-estate investment decisions, including project cash-flow, NPV, and IRR assessment.
- Built and standardized datasets for regional market reports; translated policy and transaction data into evidence-based recommendations for clients.
- Coauthored two industry white papers on Greater Bay Area real-estate markets and investment trends.

WORKSHOPS, SEMINARS & CONFERENCES

Computational and Analytic Techniques in the Humanities and Social Sciences (University of Cyprus, remote)	2025
Introduction to Data Science (IE University, Santander Open Academy)	2024
Generative AI (MIT Professional Education, Santander Open Academy)	2024
Data Science Summer School (Hertie School Data Science Lab, remote)	2022
SFS Cavalcade Asia-Pacific Conference (CUHK Shenzhen & Shenzhen Finance Institute, remote)	2022
Workshop on Public Speaking and Investor Pitching (NCU Interdisciplinary Doctoral School)	2022
EURAXESS Science Slam China Science Communication Training (remote)	2021/2023

OTHER INFORMATION

Languages: Native speaker of Chinese (Mandarin); English (C1)

Technical Skills: R; Stata; Beginner in MATLAB; $\text{\LaTeX}$; Microsoft Office and VBA

Certificates: CFA Level I
